

Cisco Webex Calling with AT&T

Supporting your journey towards cloud communications

Let AT&T help you build the communication and collaboration platform your enterprise needs, while adopting the progressive capabilities enabled by cloud deployment.

Need to move to a more cost-efficient telephony system or provide the advanced collaboration features your users demand or, are you looking to integrate your voice-calling with other business-critical systems, and processes? Now you can — using Webex Calling with AT&T.

Webex Calling with AT&T is a cloud-telephony service that integrates virtually seamlessly with wider Cisco-based solutions, on-premises legacy systems or cloud-based telephony. Choosing Webex Calling with AT&T lets you migrate your telephony to the cloud at your own pace.

Intelligent, enterprise-wide collaboration made easy

The solution provides all the features of a sophisticated phone and video service, including access to the Public Switched Telephone Network (PSTN), without equipment to house and manage. It's all cloud-based and powered by the AT&T global network. Plus, mobile users can access features such as single number reach, voicemail, video services, and the ability to move between devices during a call almost seamlessly.

Improved user experience is one of the advantages offered by Webex Calling with AT&T. As it integrates current unified communications (UC) technologies with the full Webex portfolio, the platform can help businesses break down

silos, increase collaboration, and embed calling within workflows and processes.

Webex Calling with AT&T comes with all the functions you would expect — conferencing, call-forwarding, dial groups, call hold, single number reach, shared lines, and hunt groups —plus a range of advanced features:

Personalized voicemail

A virtual receptionist to greet callers

Easy-to-manage contact lists

Seamless IP-to-PSTN calling

IM, chat, and presence

Unified messaging

Simple, straightforward user portal

The solution has straightforward and scalable licensing based on monthly per-user fees, so customers can access the latest collaboration functions with minimal capital investment, simplified contracting, and predictable pricing. With AT&T aligning adoption with your organizations' cloud and UC transformation roadmap, the business benefits from increased business continuity and disaster recovery with reduced total cost of ownership (TCO), technology risk, and vendor complexity.

Easy integration with UC

As an industry leader in communications technology, AT&T can help you maximize the value of your investment in voice and UC infrastructure, helping ensure a smooth and seamless integration between current systems. Whether hosted, on-premises, or hybrid, AT&T has the tools and functions you need to meet your changing needs.

Our UC consulting experts can audit your business and communications requirements and help you plan for future business growth and evolution. This helps ensure that your Webex Calling with AT&T investment can expand and adapt as your company grows and changes.

Protect your existing infrastructure investments

AT&T recognizes that many companies have already invested in on-premises, hosted, or hybrid solutions.

Webex Calling with AT&T helps protect your existing investments in Cisco.

Working with AT&T, you can rely on experts to help you overcome the technical, commercial, and human challenges of implementing and integrating new solutions. From staff training, through revised service-level agreements, to the complexities of integrating different on-site and cloud systems, AT&T specialists are here to help.

Cisco Webex Teams with AT&T — the future of business collaboration

Webex Calling with AT&T works perfectly as a stand-alone IP telephony system, whether deployed in isolation or in combination with legacy and third-party systems. But, it also works with the new Cisco Webex Teams with AT&T to create an industry-leading collaboration and communication platform.

When you choose Webex Calling with AT&T, you also get Webex Teams with AT&T at no extra cost. An industry-leading workflow and collaboration solution, Webex Teams with AT&T includes content-management tools, whiteboard and messaging apps, calendar and meeting functions, and a range of collaboration tools.

It's easy to implement Webex Teams with AT&T in a way that's tailored to your organization's needs, is highly secure, and enhances the productivity gains you can expect from moving to the latest generation of team-collaboration technology.

Additional functionality for Webex Calling with AT&T customers — complimentary access to Webex Teams with AT&T

Webex Teams with AT&T is an advanced, easy-to-use and highly integrated workflow management and collaboration solution. It comes with:

Content sharing and management tools

Let anyone host a meeting

APIs for 3rd-party platform integration

Integrated calendar and meeting functions

Compatible with networked collaboration devices

Unified participant and contact lists

Whiteboard and collaboration features

Easy-to-use, high-quality video messaging

Instant access with always-on functionality

IP telephony tools

Instant messaging and chat apps

Use augmented and virtual reality

Instant feedback with group messaging

AT&T collaboration expertise

AT&T can help you integrate Webex Calling with AT&T and Webex Teams with AT&T with UC platforms from other vendors, including Google and Microsoft. With a global footprint in over 100 countries, we're there to support you wherever you do business.

Our expert consultants can help you envision and strategize a UC transformation roadmap. With a track record in delivering world-class network and communications solutions, AT&T can help take your voice, UC and video technologies towards integrated and automated business processes.

With an active-user license model, Webex Calling with AT&T is both highly cost-effective and easily scalable. The solution has a single, straightforward contract and consistency of billings, so costs are predictable and easy to manage. As the platform is constantly updated with new features and functions, companies no longer need to factor in the periodic expense and disruption caused by system-wide upgrades.

Webex Calling with AT&T and Webex Teams with AT&T is your gateway to new standards in team collaboration and innovation.

Virtually seamless, expert migration planning

Migrating to Webex Calling with AT&T need not be costly or disruptive. Through our adoption plan, Acquire & Grow with AT&T, you get the communications and collaboration features you need today — and have confidence that you can migrate further functions to the cloud easily and in a controlled manner when your business needs. Through Acquire & Grow with AT&T, the legacy investment and financial planning barriers inhibiting migration to contemporary solutions have been removed.

Protects investment in on-premises infrastructure

Eases transition to cloud calling, meeting, and messaging

Eliminates overhead of maintenance

Streamlines administration with one subscription

Reduces and makes costs more predictable

Accelerates move to agile IT platform

Expand to Cisco Webex Meetings with AT&T

Webex Calling and Webex Teams with AT&T are fully compatible with Webex Meetings with AT&T. This includes the familiar Webex features of screen-sharing, video conferencing and remote desktop capabilities, as well as standard desktop conferencing. In addition, Webex Meetings with AT&T allows you to host webinars with up to 40,000 participants.

When the requirement for an inclusive and integrated company-wide meeting platform becomes a business imperative, Webex Meetings with AT&T can be activated for maximum flexibility and return on investment (ROI).

Webex Meetings suite can include modules for on-demand training to over 1,000 participants, and Webex Support to provide efficient customer services with remote desktop control and live chat.
